

In the Specification:

Please amend the paragraph on page 11 beginning at line 17 as follows.

Al

The B-type marker **326** also instructs the billing module **130** to keep track of the number of "3-pitch" sheets that are processed. A pitch is related to a sequence of events that comprise, for example, a xerographic printing process. For example, the sequence of steps required to infuse a sheet with one color toner can be classified a pitch. A 3-pitch sheet is a sheet that is processed through a basic sequence of steps three times. For example, a sheet longer than 9 inches is a 3-pitch sheet. An instruction to the billing module **130** to keep track of the number of 3-pitch sheets is, for example, found in a second expression **426**:

$$M2 = P2 * 100$$

wherein **P2** reflects a marker **326** count of every hundredth 3-pitch sheet.
